THE DOT FAIRYLAND

"That bird must be a sea gull," said Tom, "cause they live on fish." "Ah," shouted the Crow just then, "we are nearing the Snow Queen's Palace. See the icebergs in the water!" "Oh, look," cried Alice. "There's a great big white animal standing on the ice yonder. Won't he catch cold?" "Oh, no," croaked the Crow, pleasantly, "he always lives in the icy regions. That's a—"

To find out what sort of animal Alice saw standing on the ice, join the dots with a pencil line, beginning with dot No. 1 and taking them in numerical order. Make the lines straight and use a rather soft pencil. Then cut out and paste each day's picture in a scrap book, and when the last one in the series is printed, you will have the story of "The Dot Fairyland" complete in permanent book form.

Flying Boat Climbs 3,550 Feet in Ten Minutes, a Remarkable Record.

NEWPORT NEWS, VA., September 28.—Tests of the N-9 flying boat and the combination land and water machine were successfully completed here to-day, following which the government naval aerial board left for Washington.

The board, according to officials of the Atlantic Coast Aeronautical Station, will recommend to the government the purchase of thirty of the two types of machines.

The machines used here in the tests will be placed aboard the cruiser North Carolina within the next ten days, according to reliable advice.

The N-9 to-day climbed 3,550 feet in ten minutes, a remarkable record for a machine of this type. The machine makes a maximum speed of sixty-five miles an hour and a minimum of forty-five.

The new machines will replace the antiquated types now used by the United States government, which is reorganizing the aerial branch of the army and navy.

son, his voice rising to a shrill falsetto.

"Marjorie is on that boat!"

"Don't you dare call me names. We are one as bad as the other. And what do I care whether Marjorie is there or not? Here! where are you going?"

"Let me go, I tell you! Let me go or I'll strike you!"

"What do you mean to do?"

"Start out to save them, of course. I pray to God I may not be too late."

The sounds of a furious struggle reached the astounded Osuka. Broken curses and breathless threats told that the son was striving to choke his father into helplessness, while the older man was not only determined that no alarm should be given, but that this fool boy should be prevented from ruining his own future.

Before the Japanese could determine how to act for the best he heard a door being unlocked, and the younger West rushed out into the sunshine.

But a shot crashed from the interior of the building, and Marjorie's lover staggered and crumpled up on the ground.

By this time some people in the village had become aware of unusual happenings in the office of the fishing company, so a score or more heard the report and saw Thomas West fall. They knew, too—a vitally important thing—that Osuka was not the assailant, and were ready in consequence to believe the dramatic story he poured out when a number of men hurried forward in response to his excited recitations.

The terrible truth soon became manifest. Richard West, maddened by fear and rage, had actually fired at his own son. Perhaps he did not mean to kill the unhappy youth, and only had it in his frenzied mind to frighten him into

submission. Be that as it may, the bullet had entered the young man's heart, and the father was with difficulty prevented from adding another crime to the terrible one already laid to his account. He fired more than once at the men who sought to arrest him, but Osuka contrived to trip him up, and he was handcuffed promptly and led away.

But an almost more tragic possibility yet faced the horrified people. Osuka managed to convince them that West had really planned the murder of Burton and Rogers, and those who knew Jim Waide did not hesitate to believe that the presence of Marjorie would hardly deter him from accomplishing a grim and tragic mission. Therefore, hastily securing a rifle or two, they manned a couple of the fastest boats in the fishing fleet and set out after the Mary II.

That tiny craft was now only a dim speck on the horizon, and could not be discerned at sea level. The fishermen knew that Rogers would head straight for a bank which at that period of the year was alive with fish, so wasted no time in fruitless search, but took a precise line. They were rewarded within half an hour by seeing the Mary II at a distance of about two miles.

HOW TO REDUCE YOUR WEIGHT

A SIMPLE, SAFE, RELIABLE WAY.

People who are overburdened with surplus fat know only too well the discomfort and ridicule that overeat people have to bear.

If you are carrying around five or ten pounds of unbecoming fat, you are unnecessarily weakening your vital organs and are carrying a burden which destroys the beauty of your figure.

There is no need of any one suffering from superfluous fat. If you want to reduce your weight in a simple, safe and reliable way, without starvation diet or tiresome exercise, here is a test worth trying. Spend a few minutes as you can in the open air, breathe deeply and get from Traile Drug Co. or any good druggist a box of oil of korein capsules; take one after each meal and one before retiring at night.

Oil of korein is absolutely harmless, is pleasant to take, and has been used for years by thousands of people. Even a few days' treatment has been reported to show a noticeable reduction in weight. Footnote: become lighter, your work seems easier and a lighter and more buoyant feeling takes possession of your whole being.

Every person who suffers from superfluous fat should give this treatment a trial—Adm.
